SUMMARY

Full stack software engineer committed to creating beautiful websites and intuitive user interfaces. Experience in Ruby, Ruby on Rails, JavaScript, React, Redux and CSS. Enjoys the mix of logic and creativity in coding. Fluent in Japanese and French. Background in fashion merchandising.

TECHNICAL PROJECTS

Nido - [Github Backend](#) | [Github Frontend](#)

A web app to connect volunteers offering up housing with caseworkers representing refugees & asylum seekers

- Built React app with double authentication & authorization between hosts and caseworkers
- Leveraged Redux to enhance the readability and efficiency of the React components
- Built a Ruby on Rails API to store information on the users, home listings and cases

SKINN - [Github Backend](#) | [Github Frontend](#)

A React application to select and curate natural beauty regimens

- Built React app with Bcrypt authentication & client-side routes using react-router
- Configured ActiveRecord associations with Postgres to store data on users & beauty products
- Constructed custom algorithm to generate suggested products based on the user's skin type

Ellis - [Github Backend](#) | [Github Frontend](#)

A Vanilla Javascript U.S. citizenship test flash card application

- Built using JavaScript with interactive UI such as event on scroll and card flip
- Used Chart.js to visualize the user's past test score analysis & current session data
- Created Ruby on Rails API to store information on users' past scores

TECHNICAL SKILLS

JavaScript, React, Redux, Ruby, Ruby on Rails, Sinatra, ActiveRecord, SQL, PostgreSQL, Git, HTML, CSS
